- Understand how organisations establish their corporate objectives;
- Visualise how underwriting strategy forms part of the corporate objectives;
- List factors involved in designing a new product;
- Describe the importance of key technical personnel; and
- Discuss the factors involved in maintaining a platform for competitive positioning.

What is Covered

Underwriting Policy and Corporate Objectives

Distribution Channels

Binding Authorities and Line Slips

Contribution of Research

- Customer Segmentation
- Cover to be Provided
- Demand for a Product
- Competitive Positioning

Resource Capability

- Expertise
- Systems

Entry and Exit Costs

- Product Costs
- Staff Costs

Reserving Policy

- Significance of Reserving Policy
- Reserving Policy in Practice
- Implications of Portfolio Underwriting Management

Product Mix

• Impact of Product Mix on Portfolio Underwriting

Module 3: Underwriting Policy and Practice

Learning Outcomes

On completion of this module, you should be able to:

- List underwriting considerations;
- Recognise internal and external constraints;
- Explain the planning process in underwriting;
- Appreciate the importance of liaison between various departments; and
- Understand how to assess and analyse risk information.

What is Covered

Underwriting Considerations

- Policy Terms
- Excesses
- Deductibles
- Loadings and Incentives
- First Loss
- Scheme Underwriting

Internal and External Constraints

- Scope of Cover
- Limits to Cover
- Market Position
- New Business Growth
- Retention

The Planning Process in Underwriting

Liaison with Other Areas of the Business

Risk Information, Acceptance, Evaluation, and Control Criteria

Module 4: Pricing

Learning Outcomes

After completing this module, you should be able to:

- Understand the availability of the necessary data from both internal and external sources;
- Understand the statistical methods and the need for more than one statistical method to better work out the pricing and to make comparisons;
- Understand the various components required to make up the gross rate;
- List other factors that can affect pricing;
- Discuss the effect of pricing from an insurer's perspective;
- Describe the Investment Cycle and the Underwriting Cycle; and
- Know how to interpret and use claims information.

What is Covered

The Source, Availability, and Nature of Data

External and Internal Data

- External Data
- Internal Sources

Statistical Methods Used in Risk Pricing

- Prospective Pricing
- Retrospective Pricing
- Burning Cost

The Effect On Pricing

- Expenses
- Inflation
- Return on Capital
- Capital Asset Pricing Model (CAPM)
- Investment Income
- Tax
- Intermediary Remuneration
- Levies
- Planned Profitability

The Investment Cycle

Implications on Underwriting

Interpretation and Use of Claims Information

- Setting the Rate and Price
- Setting Reserves
- Statutory Requirements

The Underwriting Cycle

- Seasonal and Cyclical Influences
- Implications for an Underwriter

Module 5: Reinsurance

Learning Outcomes

On completion of this module, you should be able to:

- List the various types of reinsurance;
- Distinguish between treaty and facultative reinsurance;
- Explain how to manage a reinsurance programme; and
- Discuss commutations and the various types of risk profiles.

What is Covered

Outwards and Inwards Reinsurance

Reinsurance Programmes

- Facultative Reinsurance (FAC RI)
- Treaty Reinsurance

Management of Reinsurance Programmes

- Security Committee
- Selection of Reinsurer
- Commutations
- Risk Profile

Module 6: Underwriting Portfolio Exposures

On completion of this module, you should be able to:

- Analyse a risk, using both qualitative and quantitative methods;
- Predict emerging risks and systemic losses; and
- Discuss how to manage potential loss exposures and arrange capacity to share the risk.

What is Covered

Aggregation and Measurement of Exposure

- Single Risks
- Single Events
- Catastrophe Modelling
- Aggregation of Losses

Emerging Risks

Systemic Losses

Managing Exposure and Enabling Capacity

- Layered Covers and Deductibles
- Gross and Net Acceptance Limits
- Co-Insurance
- Alternative Financial Instruments
- Availability of Reinsurance

Module 7: Operational Controls

On completion of this module, you should be able to:

- State the definition and objectives of managing people;
- Explain how to use authority limits as an operational control; and
- Discuss the use of auditing.

What is Covered

People Management

- Performance Management
- Training and Development
- Skill Sets

- Key Performance Indicators (KPI)
- Continuing Professional Development (CPD) For Employees

Authority Limits as an Operational Control

The Use of Auditing

- The Approach and Importance of Auditing
- Peer Review
- Internal Auditing
- External Auditing

Module 8: Monitoring and Control

On completion of this module, you should be able to:

- List the objectives of monitoring;
- Describe the key areas to be monitored;
- Discuss the techniques used in monitoring; and
- Explain the use of forecasting and monitoring for better underwriting results.

What is Covered

Purpose of Monitoring

What Should Be Monitored?

Key Performance Indicators (KPIs)

Techniques for Monitoring Underwriting Results

- Software Applications
- Pre-Set Criteria
- Checklists
- Tests
- Benchmarking

Usage of Information Derived from Monitoring

- Forecasting Performance
- Action Plans

Monitoring, Forecasting, and the Underwriting Strategy
